## **DETAILED ACTION**

### ***Election/Restrictions***

Regarding the previous office action's statement that claims 16-25 were elected without traverse. This was an error only in that the statement was intended to state that because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Further, the response canceled claims 16-25, making this point mute.

Therefore the only claims currently pending are 1-15, with 15 withdrawn from consideration.

Claims 1-14 are generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claim 15, directed to a species is no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim. In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no

longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

### ***Reasons For Allowance***

Therefore, the allowed claims are 1-15.

The following is an examiner's statement of reasons for allowance: prior art could not be located that taught producing a carrier wafer for an integrated circuit comprising providing a carrier wafer having a plurality of bump pads and a plurality of wire bond pads; providing a passivation layer on said carrier wafer; etching a passivation layer over at least a portion of said plurality of bump pads; applying solder bumps on said plurality of bump pads; and separately etching the passivation layer over at least a portion of said plurality of wire bond pads.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited prior art teaches the state of the art.
